

# Templates for Coherent, Relevant, Creative, and Diverse Text

- Coherence and relevance
  - Parameters: Top-k (5), temperature (0.5), beam search (on), diverse beam search (on), top-p (0.9)
  - Reasoning: These parameters can help produce text that is both coherent and relevant, with limited randomness.
- Coherence and creativity
  - Parameters: Top-p (0.7), temperature (1.0), beam search (on), diverse beam search (on), top-k (10)
  - Reasoning: These parameters can help produce text that is both coherent and creative, with some variability in the generated text.
- Coherence and diversity
  - Parameters: Top-p (0.5), top-k (20), temperature (0.8), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is both coherent and diverse, with some variability in the generated text.
- Relevance and diversity
  - Parameters: Top-p (0.6), top-k (30), temperature (0.5), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is both relevant and diverse, with some variability in the generated text.
- Creativity and diversity
  - Parameters: Top-p (0.3), top-k (50), temperature (1.2), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is both creative and diverse, with more variability in the generated text.
- Structured and precise
  - Parameters: Top-k (5), temperature (0.4), beam search (on), diverse beam search (off), top-p (0.9)
  - Reasoning: These parameters can help produce text that is both structured and precise, with limited variability in the generated text.
- Unstructured and creative
  - Parameters: Top-p (0.2), temperature (1.5), beam search (off), diverse beam search (on), top-k (50)
  - Reasoning: These parameters can help produce text that is unstructured and creative, with high variability in the generated text.
- Natural and coherent
  - Parameters: Top-p (0.8), top-k (10), temperature (0.7), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is natural and coherent, with some variability in the generated text.
- Varied and relevant
  - Parameters: Top-p (0.6), top-k (20), temperature (0.5), diverse beam search (on), beam search (on)
  - Reasoning: These parameters can help produce text that is varied and relevant, with some

variability in the generated text and structure.

- Expressive and diverse
  - Parameters: Top-p (0.3), top-k (30), temperature (1.2), diverse beam search (on), beam search (on)
  - Reasoning: These parameters can help produce text that is expressive and diverse, with higher variability in the generated text and structure.
- Precise and concise
  - Parameters: Top-k (3), temperature (0.3), beam search (off), diverse beam search (off), top-p (0.8)
  - Reasoning: These parameters can help produce text that is both precise and concise, with limited variability in the generated text.
- Expressive and coherent
  - Parameters: Top-p (0.5), temperature (1.0), beam search (on), diverse beam search (on), top-k (10)
  - Reasoning: These parameters can help produce text that is both expressive and coherent, with some variability in the generated text.
- Natural and diverse
  - Parameters: Top-p (0.7), top-k (20), temperature (0.8), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is natural and diverse, with some variability in the generated text.
- Structured and varied
  - Parameters: Top-p (0.6), top-k (30), temperature (0.5), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is structured and varied, with some variability in the generated text and structure.
- Creative and relevant
  - Parameters: Top-p (0.3), top-k (50), temperature (1.2), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is creative and relevant, with higher variability in the generated text and structure.
- Natural and relevant
  - Parameters: Top-p (0.8), top-k (10), temperature (0.7), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is natural and relevant, with some variability in the generated text.
  - Example of command: Set following parameters as follow: top-p (0.8), top-k (10), temperature (0.7), diverse beam search (off), beam search (on). Next, rewrite this title using new parameters value. You can change words if feels like. Here is the title: Title: Parameter Combinations for Coherent, Relevant, Creative, and Diverse Text Generation
- Expressive and diverse
  - Parameters: Top-p (0.3), top-k (30), temperature (1.2), diverse beam search (on), beam search (on)
  - Reasoning: These parameters can help produce text that is expressive and diverse, with higher variability in the generated text and structure.
- Concise and varied
  - Parameters: Top-p (0.6), top-k (20), temperature (0.5), diverse beam search (on), beam search

(off)

- Reasoning: These parameters can help produce text that is concise and varied, with some variability in the generated text and structure.
- Coherent and expressive
  - Parameters: Top-p (0.5), temperature (1.0), beam search (off), diverse beam search (on), top-k (10)
  - Reasoning: These parameters can help produce text that is both coherent and expressive, with higher variability in the generated text.
- Varied and creative
  - Parameters: Top-p (0.3), top-k (50), temperature (1.5), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is varied and creative, with high variability in the generated text and structure.
- Structured and concise
  - Parameters: Top-p (0.7), top-k (20), temperature (0.5), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is structured and concise, with some variability in the generated text.
- Natural and diverse
  - Parameters: Top-p (0.5), top-k (30), temperature (0.8), diverse beam search (on), beam search (on)
  - Reasoning: These parameters can help produce text that is natural and diverse, with higher variability in the generated text and structure.
- Creative and expressive
  - Parameters: Top-p (0.3), top-k (50), temperature (1.5), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is creative and expressive, with high variability in the generated text and structure.
- Coherent and structured
  - Parameters: Top-p (0.5), temperature (0.8), beam search (off), diverse beam search (off), top-k (10)
  - Reasoning: These parameters can help produce text that is both coherent and structured, with limited variability in the generated text.
- Natural and precise
  - Parameters: Top-p (0.8), top-k (5), temperature (0.5), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is natural and precise, with limited variability in the generated text.
- Precise and concise
  - Parameters: Top-p (0.9), top-k (10), temperature (0.5), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is precise and concise, with limited variability in the generated text.
- Natural and structured
  - Parameters: Top-p (0.5), top-k (20), temperature (0.8), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is both natural and structured, with

some variability in the generated text.

- Varied and consistent
  - Parameters: Top-p (0.3), top-k (30), temperature (0.5), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is varied and consistent, with some variability in the generated text.
- Expressive and precise
  - Parameters: Top-p (0.2), top-k (50), temperature (1.2), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is expressive and precise, with high variability in the generated text and structure.
- Structured and creative
  - Parameters: Top-p (0.6), top-k (10), temperature (1.5), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is structured and creative, with high variability in the generated text.
- Natural and consistent
  - Parameters: Top-p (0.5), top-k (20), temperature (0.5), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is natural and consistent, with limited variability in the generated text.
- Expressive and varied
  - Parameters: Top-p (0.3), top-k (30), temperature (1.2), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is expressive and varied, with high variability in the generated text and structure.
- Precise and natural
  - Parameters: Top-p (0.8), top-k (5), temperature (0.5), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is both precise and natural, with limited variability in the generated text.
- Expressive and consistent
  - Parameters: Top-p (0.2), top-k (50), temperature (0.5), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is expressive and consistent, with limited variability in the generated text.
- Detailed and precise
  - Parameters: Top-p (0.2), top-k (10), temperature (0.3), diverse beam search (off), beam search (off)
  - Reasoning: These parameters can help produce text that is detailed and precise, with a limited amount of variability in the generated text.
- Creative and varied
  - Parameters: Top-p (0.5), top-k (50), temperature (1.5), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is creative and varied, with a high amount of variability in the generated text and structure.
- Clear and concise
  - Parameters: Top-p (0.2), top-k (5), temperature (0.2), diverse beam search (off), beam search (on)

- Parameters: Top-p (0.9), top-k (5), temperature (0.2), diverse beam search (off), beam search (on)
- Reasoning: These parameters can help produce text that is clear and concise, with limited variability in the generated text.
- Emotive and varied
  - Parameters: Top-p (0.3), top-k (30), temperature (1.0), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is emotive and varied, with a high amount of variability in the generated text and structure.
- Coherent and natural
  - Parameters: Top-p (0.7), top-k (20), temperature (0.5), diverse beam search (off), beam search (on)
  - Reasoning: These parameters can help produce text that is coherent and natural, with limited variability in the generated text.
- Humorous and unpredictable
  - Parameters: Top-p (0.4), top-k (25), temperature (1.2), diverse beam search (on), beam search (off)
  - Reasoning: These parameters can help produce text that is humorous and unpredictable, with a high degree of variability in the generated text.
